

CT, MRI, Ultrasound & X Ray

Diagnostic Imaging available for GP self-pay and insured patients at our centres in Sussex. Immediate appointments available for CT, X-Ray, MRI and Ultrasound within 2- 4 days, report turnaround 48 hours.

Computerised Tomography

A CT scan is a commonly used diagnostic procedure to image all parts of the body using ionising radiation. It can diagnose a wide range of conditions including screening for coronary heart disease and some types of cancer.

Magnetic Resonance Imaging

MRI is a commonly accepted and widely used diagnostic medical procedure producing extremely detailed images of the body without the use of ionising radiation.

MRI is available for:

- Musculoskeletal system
- Brain and IAMs
- Spinal cord
- Pelvis
- Other body areas following discussions

Ultrasound

A full range of ultrasound is available for:

- Gynaecology
- General Abdominal
- Small Parts
- MSK
- DVT
- Aortic and Carotid screening

X Ray

A routine X-ray service is available for plain film referrals.
